#### **EDUCATION**

# University of Pennsylvania, Philadelphia, PA

M.S.E. in Data Science

May 2019

- Classes: Vision & Learning, Data Mining, Big Data Analytics, F1/10: Autonomous Racing Cars.
- Thesis: mapping roads in Ghana with DeepLab trained on 30cm satellite data from Khartoum.
- AP-Latam: mapping roofs in slums with Mask R-CNN trained on 50m satellite data from Rio.

## B.S.E. in Networked and Social Systems

May 2018

- Gun Violence Database: automated crowdsourced information extraction of articles with NLP.
- Human Computation 2017: presented poster on crowdsourced summaries of privacy policies.

### **EXPERIENCE**

**Radiant Earth Foundation**, *Geospatial ML Intern*, Oakland, CA

Jul

Jun 2018 - Aug 2018

- Nonprofit providing open access and analytics on Earth imagery for global development.
- <u>Training Dataset for Global Land Cover Classification</u>: generated per-pixel labeling in test areas with Random Forests trained on 10m satellite data at 80% accuracy, presented at NeurIPS 2018.

## **Azavea**, Open Source Software Fellow, Philadelphia, PA

Jun 2017 - Dec 2017

- <u>B Corporation</u> creating civic geospatial web software while advancing state-of-the-art research.
- GeoTensorFlow: enabled Scala geospatial data processing engine to run trained Python models.
- Planet-Amazon Kaggle: under VP of Research, interactively showed tagging results on a map.

### **Hack4Impact**, *Software Developer*, Philadelphia, PA

Sep 2014 - Dec 2017

- Student organization building software applications to help nonprofits maximize their impact.
- Asylum Connect Catalog: specified product with client and led development of Flask backend.
- Transcribe4All: enabled concurrent transcription of audio links, identifying search terms, in Go.

### **Meetup**, Core Engineering Intern, New York, NY

May 2016 - Aug 2016

- <u>Social network</u> of 3M monthly attendees, 40M members, and 300K Meetup groups globally.
- App relaunch: under Senior API Engineer, sped queries and fixed API bugs in Java and Scala.

### **Clarifai**, *Machine Learning Research Intern*, New York, NY

May 2015 - Aug 2015

- Al startup in visual recognition, won top five places in image classification at ImageNet 2013.
- Shot boundary detection: led by CTO, built Django demo of dataset to facilitate video tagging.

#### **SKILLS**

**Data**: NumPy, Pandas. SciKit-Learn, Keras, TensorFlow, PyTorch. Spark, Elastic MapReduce. AWS, GCP. **Programming**: Python, Flask, SQLAlchemy, Git, Unix. Java, Scala. JavaScript, Go. Matlab, C++. OCaml. **Leadership**: Hack4Impact executive board, PennQuest orientation trip, Penn Alternative Breaks trip.
